

Single Part Dispensing System

The X-201 is a single dispense system for high viscosity, heavily filled, abrasive and chemically aggressive materials. This machine is cart mounted and ready for use in any environment. Its superior resistance to abrasion and consistently accurate dispensing make it the system of choice where low maintenance and improved safety are at issue.

Specifications

Viscosity Range:	up to 2,000,000 cps
Flow rate:	0.5cc to 10.0cc per second
Shot size:	0.5cc to 100cc
Accuracy:	+/- <2%
Shop Air:	80 PSI <1 CFM
Power:	100 – 240 VAC Single Phase 208 VAC Triple Phase 50/60 Hz
Dimensions:	37" x 26" x 52"
Weight:	150 lbs.

Features

- Superior Abrasion Resistance
- Digital Control
- Touchpad Interface
- Proprietary PC pump technology
- 5 gallon stainless Tanks
- High and low level sensor
- Automation Interface
- "Suck back" capable
- Optical Part Locating Sensor
- Cart mount for mobility
